

Please do not implement any proposal that lessen Indiana's Telephone Privacy law protections.

My evening meal time used to be interrupted at least once per night because of telemarketers. After I put my name on Indian's Telephone Privacy law protection, the number of calls I get is approaching 0. It's wonderful!

It seems like the phone is mine and if I want to prevent telemarketers from calling, by using Indiana's law, I should be able to.

Indiana's law is working. Please don't lessen it.

Thank you.
